### **Amano Security Systems Launch its Newest Access Control Readers**

Palm Harbor, May 11, 2009 - Amano Security Systems, Inc. recently introduced the Nexus 220, the next generation in scalable access control systems for small to medium organizations. Amano Security is now proud to release their new Multi-Mode Wiegand Readers. These readers have been specifically developed in response to the market demands for their signature series of metal proximity readers, which now provide a consolidated reader offering. These new models offer multi-mode configuration making them compatible with most industry standard 125 kHz proximity cards. They output the common Wiegand card bit making them compatible with all Amano access systems as well as most popular access control system brands available on the market.

Key features include:

- Reads most 125kHz proximity cards
- Field Programmable bit format
- 26-Bit Wiegand keypad output
- 12V DC or 5V DC supply
- Tri-color LED
- Reader "Hold" input
- Communication up to 500ft (150 Meters)
